

## Product Categories

### **What Product Categories are available to purchase?**

Items are available pursuant to the University's procurement guidelines. Your account administrator is enabling you to make the right buying decisions for your business needs. Should you any questions please contact Carey.Keo@ku.edu.

### **Are there any category restrictions?**

There are several product categories that may contain items that are not compliant based on our organization's procurement policies. You may see "Organization Restricted" messaging throughout the shopping experience. Product pages marked as "Organization Restricted" may be available for purchase; **however**, you are responsible for ensuring your purchases are compliant with University policies and guidelines. *You are responsible for the purchases made under your account.*

### **How will I know I am shopping from a diverse supplier?**

We have marked Diversity and Ownership Credentialed Sellers as "Organization Highlighted" on the Amazon Business account. When shopping, you will notice a green check mark with messaging "Organization Highlighted," on items that have an offer from a Diverse Supplier. We have made this update so you can easily find and shop from credentials suppliers through the Amazon Business account. You can also apply filters on the left hand side of the search results screen for specific credentials.
